

The Humanitarian Fund

2022 Annual Report

Save the

Children

Message from the **Humanitarian Director**

2022 was a year where the unthinkable, but not the unpredictable, carved its way into many countries, with intertwining factors exacerbating humanitarian needs and crises across the world.

Save the Children (SC) rose to the challenge of preparing, responding and doing more, thanks to the \$210 million of flexible funding that SC Members channelled through the Humanitarian Fund (HF). Your trust and the enabling power of flexible funds allowed us to step up and scale-up immediately as and when needed.

To respond to the global hunger crisis, which is affecting the most basic needs for survival and mixing dangerously with conflicts and other socio-economic dynamics, the HF allocated \$42.4 million in flexible funding. Whilst this is significant, increasing support is still needed as hunger becomes entrenched in children's realities.

At the same time, the Ukraine crisis is threatening children's ability to grow up free from fear, whilst exposing more than 15 million people to the distresses of becoming refugees or displaced within their own country. To this immense challenge, an unprecedented \$109 million was contributed by Members. We were able to step up and start implementing activities within days of the escalation of the war, both in Ukraine and through a joined-up regional refugee response. Similarly, the HF contributed funding to the needs of children affected by conflict in other countries such as Afghanistan, DRC, Ethiopia, the Sahel, Syria and Yemen.

The impacts of climate change spared no region, and we supported both smaller and larger emergencies caused by extreme climate events, including the floods in Pakistan, which shook the whole country. I visited the response last year, and was truly pleased to see the impact of flexible funding used for preparedness, as previous HF funding from 2021 had set the foundations for the response, enabling SC to be among the first to respond.

Country teams are also making flexible funds go the extra mile: reallocating and freeing up flexible resources that can be used in more than one way, investing in innovative projects that might need proof of concept before traditional donors can fund them, scaling up responses and complementing multi-sectoral and integrated interventions.

This is a fund for country offices, and we hope that through your commitment and support in 2023 we will be able to continue investing in their great ideas and strategies. Our target for this year is \$120 million. With your contributions we will be able to achieve this ambition and further support our teams with quality, predictable funding so that teams can prepare, anticipate and respond to crises, hand in hand with local and national partners. Please join us in this ambition for 2023.

Executive Summary

In its second year of operation, the HF remained more relevant than ever, given the increasing scale and complexity of humanitarian crises. The war in Ukraine, the climate crisis and the continued rise in global hunger had a profound impact on countries across the world. Perhaps a reflection of the severity of the situation and needs, the HF continued to grow at a rapid pace, channelling over four times the amount of funding in 2022 than it did in 2021.

The HF met its initial funding target of \$60 million halfway through the year in June, which was followed by a new ambitious target of \$200 million for 2022 so we could better support countries to respond to the hunger crisis. This target included both fully flexible and earmarked funding, but excluded contributions earmarked for the Ukraine crisis. By the end of the year, members had channelled over \$100.8 million in flexible funding to humanitarian emergencies through the HF, in addition to a further \$109.2 million pledged for the Ukraine crisis, bringing the total amount of funding managed by the HF to over \$210 million.

In 2022, the HF made 347 funding allocations to 62 country offices (CO), regional offices (RO), national offices (NO) and members. The total value of these allocations was over \$154.6 million, including \$96.1 million in flexible funding and \$58.5 million earmarked to the Ukraine crisis. Over 24.4 million people were reached in countries that received funding from the HF.

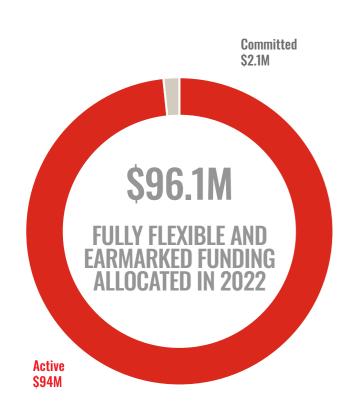

Countries that received HF funding responded to a broad range of crises, from war and conflict to disease outbreaks, such as cholera and ebola, and from earthquakes to hunger and food insecurity. Faithful to its design, support to responses included major crises which affected entire countries and their neighbours and smaller emergencies that did not have the same media attention or access to resources, such as tropical storms in the Latin America and the Caribbean (LAC) or East and Southern Africa (ESA) regions. 26% of allocated resources was channeled to countries categorised as level 3 and 4.

Over \$8.5 million, equivalent to 9% of all HF allocations, was channeled in advance of crises, supporting countries to prepare for predictable emergencies, strengthening the resilience of communities and improving the efficiency and effectiveness of potential responses. Similarly, in line with SC and global priorities to promote localisation and locally led action, COs provided more than \$14.7 million in HF funding to local and national partners in 2022.

Over the past two years, the HF has progressively become an established enabler, ensuring it provides the needed support to SC's humanitarian responses and anticipatory action initiatives through fast and efficient flexible funding. This would not have been possible without your commitment and trust in the HF. In 2023, we will focus on further exploring ways in which flexible funding can enable countries to maximise their impact and anticipate and respond to emergencies strategically and innovatively. Your continued support will help countries meet the needs of children in humanitarian crises across the world with speed and flexibility.

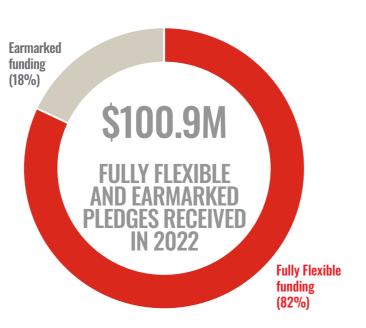

The Fund at a glance

A total of \$210M was pledged to the HF in 2022, comprising \$100.9M in fully flexible and earmarked funding, as well as over \$109.2M specifically for the Ukraine crisis. This translated into allocations worth over \$154.6M, of which \$96.1M included flexible funding and funds earmarked to specific countires, and \$58.5M for the Ukraine and regional refugee crisis. At the end of 2022, the overall spend on HF awards was \$142.6M, which includes spend on allocations from both 2021 and 2022. Of this, \$114.3M (80%) was spent in 2022 and 80% of this has been spent on program delivery. Between January and December, over 24M people were reached in countries that received support from the HF. The following graphs provide a snapshot of the HF for 2022.

AWARDS ALLOCATED

The HF made 347 funding allocations in 2022. Excluding \$58,486,486 earmarked to the Ukraine response, the total value of the 2022 allocations is \$96,123,971. These allocations include both fully flexible funding, as well as funding earmarked to specific countries, excluding the Ukraine crisis.

PLEDGES

17 Save the Children members pledged a total of \$100.872.914 to the HF in 2022. Of these funds. \$82,257,961 were fully flexible and \$18,614,953 were earmarked to specific countries.

UKRAINE CRISIS PLEDGES

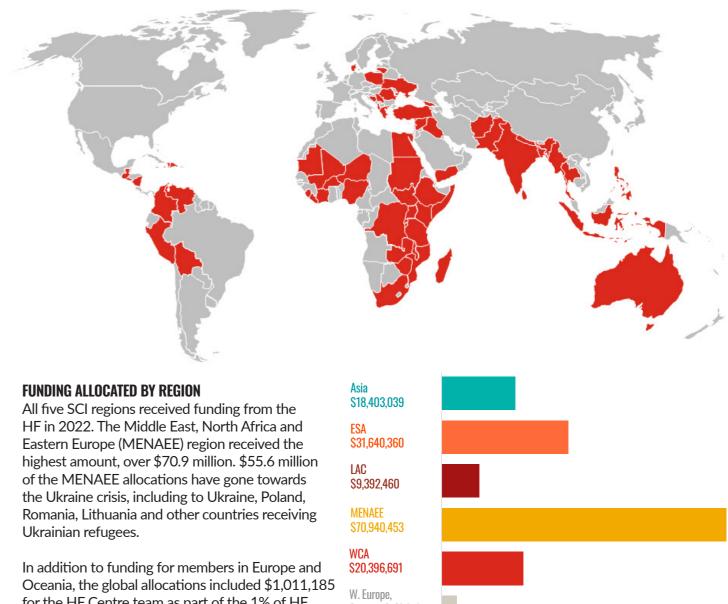

In 2022, members channelled \$109,240,547 to the Ukraine crisis through the HF. By the end of 2022, \$58,486,486 of these funds had been activated. The funds are allocated gradually, as the response prioritised the use of institutional funding with restrictions, and strategically uses the flexibility of the HF funds towards a multi-vear response.

24,411,730* **CHILDREN AND ADULTS REACHED**

These figures represent the number of children and adults reached with humanitarian action in countries that received funding from the HF in 2022.

*The annual reach is lower than the reach reported in the HF Q3 report due to errors in the reach data for Somalia and Ethiopia. which have since been fixed.

for the HF Centre team as part of the 1% of HF income used towards the continued management and administration of the HF. These funds represent 0.5% of the total 2022 contributions.

\$3,837,454

COUNTRIES. MEMBERS AND REGIONS AWARDED

In 2022, the HF awarded funding to 48 country offices, three regional offices, two national offices and nine members.

Oceania & Global

CAT	HF ALLOCATION IN 2022	%	# OF Countries
1	31,784,204	21%	8
2	71,921,211	46%	18
3	27,715,860	18%	18
4	12,185,569	8%	24
0	11,003,613	7%	12

FUNDING ALLOCATED BY CATEGORISATION

In 2022, the HF provided funding to eight countries, that were categorised as CAT1 at the time of allocation: Afghanistan, DRC, Ethiopia, Somalia, South Sudan, Syria, Ukraine and Yemen.

CAT2 countries received the most funding, with 46% of allocations going to them. This was primarily driven by high funding allocations to Ukraine. Ukraine was recategorised to CAT1 in August 2022, but at the time of the majority of the allocations it was still a CAT2.

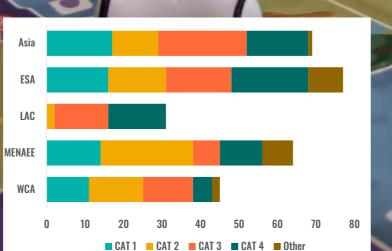

The HF also provided funding to CAT3 and CAT4 countries, which may not receive as much donor funding as some of the higher category countries. Allocations to CAT3 and CAT4 countries represented 26% of the total.

In addition to countries with ongoing responses, the HF provided funding for anticipatory action (AA) and uncategorized countries. This included funding to countries responding to an influx of refugees from Ukraine, such as Denmark, Georgia and Greece.

FUNDING ALLOCATED BY REGION AND CATEGORISATION The graph above shows the number of funding allocations made by country categorisation level for each region.

TIME TAKEN TO ALLOCATE FUNDS

A key aim of the HF is the fast release of funds to support timely response when a crisis occurs. This is measured from time of application to confirmation of an allocation and is inclusive of weekends and public holidays. The HF aims to make all allocation decisions within 48 hours.

In 2022, 43% of funding applications received a decision within 48 hours, which is under the target. However, the percentage of applications processed within two days remains the same as in 2021, despite the number of applications increasing by 30% last year.

The average time for an allocation decision to be communicated was 3.7 days. The median allocation time was 2.3 days, with the average pushed up due to the unusually long allocation times of a few earmarked contributions.

ALLOCATION DECISIONS BASED ON NEED

The HF has continued to support responses with the highest needs. The countries that received the most funding from the HF in 2022 are outlined in the table below in relation to the number of people in need (PIN) and the severity of the crisis based on the INFORM Severity Index.

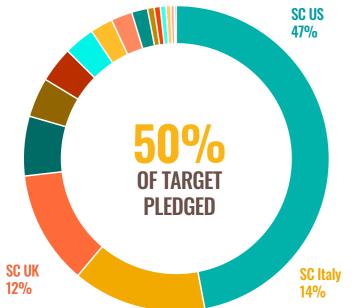

This data was sourced from the Humanitarian Needs Overview (HNO) and INFORM Severity Index¹, as of the end of January 2023. It is important to note that in addition to needs, funding criteria include the funding gap and the total of HF allocations versus level of spend. With more resources available globally, we will continue to improve our use of data going forward.

COUNTRY	HF ALLOCATIONS In 2022	PEOPLE In Need	INFORM SEVERITY INDEX
Ukraine & cross- border regional response	\$41,572,753	17.6 million	4.1
Poland	\$9,625,000	1.5 million ²	2.5
Somalia	\$8,265,284	7.8 million	4.4
Afghanistan	\$7,831,138	28.3 million	4.5
Yemen	\$6,279,197	21.6 million	4.6
DRC	\$5,810,399	26.4 million	4.2
Ethiopia	\$5,343,316	28.6 million	4.3
Syria	\$4,803,117	15.3 million	4.6
Nigeria	\$4,250,000	8.3 million	4.1
Romania	\$3,860,000	110,000 ²	1.4
Nigeria	\$2,450,000	8.4 million	3.5

The INFORM Severity Index is used to measure and compare the severity of humanitarian crises globally, launched in 2020. Each crisis is scored on a scale of 1 to 5, 1 being the least severe and 5 is the most severe. For more information, https://drmkc.jrc.ec.europa.eu/inform-index/INFORM-Severity. ²The Poland and Romania allocations are part of the regional response to the

Ukraine crisis. As no PIN numbers are available for these two countries, the number of Ukrainian refugees in Poland and Romania is used instead. Source: <u>https://data.unhcr.org/en/situations/ukraine</u>

Funding received in 2022

MEMBER PLEDGES

The HF received \$100,872,914 in fully flexible and earmarked funding from 17 members. This is 50.4% of the HF's revised annual fundraising target of \$200 million, which was increased when the original target of \$60 million was met in June. This total does not include the \$100.9 million of earmarked contributions received for the Ukraine crisis.

Localisation and Partnerships

The HF's commitment to national and local actors in line with the Grand Bargain remained a focus in 2022, with an increasing proportion of funding channelled to local and national partners through country offices.

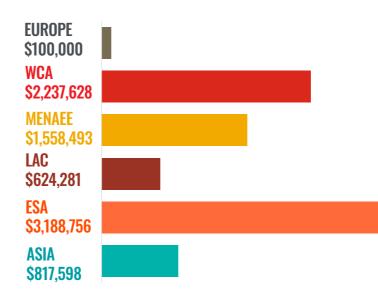

Over \$14.7 million¹, or 9.5% of all HF allocations in 2022, was channelled to local and national partners across all five regions, with over half of this amount going to partners in the MENAEE region. Furthermore, over 14% of all HF spend since 2021 has gone towards payments to partners, most of which are local and national actors.

Specific countries with high levels of HF funding going to local and national partners include: Ukraine, Syria, Pakistan and Bangladesh.

¹This figure is based on the value of new partner agreements activated in 2022 on both new and ongoing HF awards as per AMS. Due to the flexibility of funds this figure may not fully correspond with countries' level of spend on partner costs in their initial budgets.

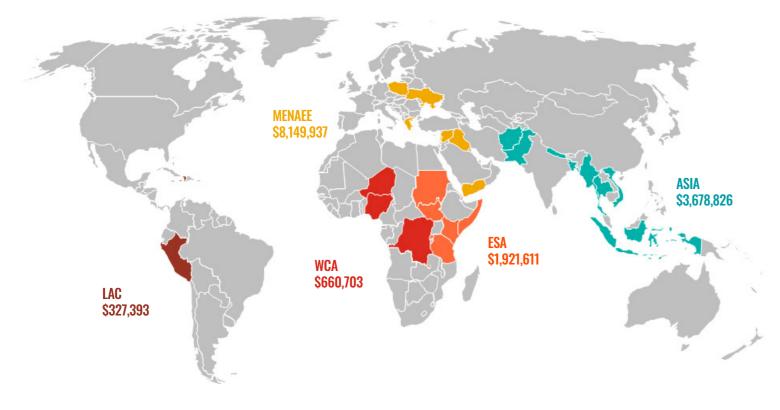

\$20.9 million (14.7%) of all HF funding has been spent on payments to partners since the start of the HF

ANTICIPATORY ACTION AND PREPAREDNESS ALLOCATIONS BY REGION

As shown above, the ESA region received the highest amount of funding for AA and preparedness in 2022. West and Central Africa (WCA) had the highest proportion of funding allocated for AA and preparedness, with 11% of all their allocations going towards anticipatory interventions and activities.

Strengthening Anticipatory Action in Nigeria

With HF funding the Nigeria CO facilitated a 3-day capacity strengthening workshop to local and national actors on AA, which included conducting a rapid risk assessment in critical humanitarian contexts in hard-to-reach locations in North East Nigeria. This analysis helped inform the type of humanitarian intervention required to respond to the floods in the area.

The Nigeria team also conducted an emergency preparedness planning workshop, which analysed pre-existing and new threats that could lead to an emergency, contributing towards the CO's AA plan.

Anticipatory Action

FUNDS ALLOCATED TO ANTICIPATORY ACTION AND EMERGENCY PREPAREDNESS

As the majority of humanitarian crises are predictable, AA and emergency preparedness are key strategic priorities for the HF. They can help minimise the impact of humanitarian crises on children and families before a disaster hits, whilst improving the effectiveness and efficiency of humanitarian responses.

In 2022, the HF aimed to allocate up to 13% of funds to AA and emergency preparedness.

\$8,526,756 was allocated to AA and emergency preparedness across 35 countries in 2022. This makes up 8.9% of all allocations, excluding earmarked allocations for the Ukraine crisis. Whilst this falls short of the 13% annual target, the HF is continuing to explore ways in which it can increase allocations for AA in 2023, whilst balancing response needs and available flexible funds at the time of applications being received.

Highlights and Impact

With an increasing emphasis on the strategic use of HF funding, the following are examples of innovative and creative ways in which countries have used the HF to amplify the impact of flexible funding broadly across responses and country programmes. This includes using HF-funded responses to leverage resources from other donors, repurposing funds to meet changing circumstances and needs, or supporting and strengthening the capacity of local and national actors to empower them to deliver sustainable and locally-led responses.

Working in Collaboration With Local Partners in DRC

In DRC, HF funding has supported internally displaced children and families in North Kivu. Local partners Umoja in Action and BIFERD were cornerstones of the intervention, providing child protection activities and constructing WASH facilities for the displaced people.

More than \$106,000 of HF funding was transferred directly to these partners as part of the project implementation, in addition to providing them with technical assistance. DRC CO is actively identifying and engaging local partners, involving them in the needs identification and proposal writing phases of the response.

Hélène*, 25, with her daughters, Furah*, 5, and Cyntia*, 2, outside of the school where they sleep at night in Eastern DRC

Photo: Hannah Mornement/Save the Children

Building Rapid Response Capacity in Venezuela

Funding from the HF supported training and preparing the first emergency response team in the Venezuela CO, improving the organization's knowledge and capacity to anticipate and respond to potential, imminent, or actual hazard events. The CO also improved its operational capacity and was positioned as the first organization in Venezuela to respond to two emergencies caused by the tropical storms in October-December 2022.

The CO's strong position as an organisation recognised for its rapid response in emergencies also helped secure over \$110,000 from the Start Fund to respond to the flooding in Zulia state in May 2022.

Child-Centred Anticipatory Action in Indonesia

The HF provided funding to SC Indonesia for flood-related AA, which involves raising community awareness on potential floods and their impact, cash transfers to families that are at risk from floods, and strengthening the capacity of partners and the government to implement contingency plans that are in place through training and drills.

The project has a strong focus on child participation, with six schools taking part in the dissemination of early warnings, contingency planning and evacuation simulations.

Flexible Repurposing of Funding in Romania

SC Romania received funding from the HF to respond to the needs of refugees from Ukraine. When funding became available through other donors who were able to cover existing costs, Romania was able to move staff costs and other project activities off the HF, repurposing the HF for increased coverage of cash and voucher assistance.

Scaling Up the Cholera Response in Malawi

When a cholera outbreak developed in Malawi over the course of 2022, the CO was able to use existing HF funding, originally allocated for the Cyclone Ana response, to start responding to the outbreak. This included raising community awareness around cholera, providing training to health workers and supporting cholera treatment centres. When the outbreak escalated further, additional funding from the HF enabled the Malawi CO to scale up the response from two to six districts to address the growing needs.

Leveraging Funding in Pakistan

The HF provided funding to the Pakistan CO to respond to the devastating floods in the summer and autumn of 2022. Part of this funding supported a multi-sectoral needs assessment in the immediate aftermath of the floods, which formed the basis for communicating urgent needs to other donors. As a result of the assessment, the Pakistan CO managed to secure over \$5 million from other donors for the response.

Conflict - War in Ukraine

When the war in Ukraine escalated in February 2022, the HF immediately committed \$2 million flexible funds to the Ukraine CO, which helped them scale up their operations immediately and start delivering aid to those in need. Funding from the HF also helped SC set up operations in neighbouring Poland, which had seen an influx of refugees from Ukraine. The HF has continued to support a multi-sectoral response in Ukraine, which has included cash programming, psychosocial support and education in emergencies, as well as refugee responses across multiple European countries.

Over the course of the response, over \$5 million has been allocated to local and national partners in Ukraine, Poland and Greece. In addition, \$9.8 million has been spent on cash transfers to people affected by the war.

FUNDS ALLOCATED TO THE UKRAINE CRISIS

\$58,486,486 was allocated for both Ukraine, as well as the refugee responses in other countries between February and December 2022.

COUNTRY	TOTAL
Ukraine	\$33,800,000

Learning and Building Resilience Through Art in Ukraine

Olena^{*}, 8, is from a small village in Eastern Ukraine. In the spring of 2022, she fled home with her mother Svitlana^{*} in search of safety from looming hostilities.

Life in their new city is calmer, and the family is adapting. Olena still attends classes online at her old school. She is in fourth grade, so her mother decided to let her finish elementary school in a familiar environment.

Svitlana^{*} prioritizes making her daughter's childhood as happy as possible, especially because Olena hasn't heard from her father (Svitlana's^{*} ex-husband) for several months. "I try to keep Olena from becoming depressed. This is her childhood, and she only has the one, despite the circumstances," she says.

Something that has helped Olena is taking painting classes at the Zelo Art Centre. It was always her dream to learn painting, but there were no classes in her village. "When I paint, I don't deny myself anything - I paint as I want. Teachers advise and help me, and I listen, but I draw in my own style," Olena shares.

HF funding is directly supporting Zelo Art Centre, Save the Children's local partner that runs the centre where Olena attends art classes. In addition to organising workshops, art classes, concerts and other psychosocial support activities for children, Zelo has provided families with bunker kits, which are widely used in shelters. Beyond providing Zelo with funding, Save the Children has also supported Zelo with training to strengthen their capacity on core organisational functions, including safeguarding and procurement.

Global Hunger Crisis

Fuelled by climate extremes, conflicts and economic instability, 2022 saw an alarming deterioration in food security and increase in children facing hunger across the world, with 345 million people becoming food insecure, of which 222 million are facing acute hunger.

To support countries' hunger responses, the HF made three designated rounds of funding allocations to countries affected by hunger. As part of these allocations, 27 countries across all five regions received a total of \$42,440,000 - over half of the HF's fully flexible contributions in 2022.

Countries affected by hunger have supported a range of responses and activities, including cash and voucher assistance to vulnerable families, food distributions, prevention and treatment of malnutrition, training and awareness raising on infant and young child feeding (IYCF), as well as vocational training to support livelihoods.

Treating Malnutrition in Niger

REFEN

Funding from the HF has been integral to combatting hunger in the Diffa, Maradi and Tillaberi regions in Niger, which are facing a deteriorating humanitarian situation and increased hunger due to drought, conflict and population displacement.

Indatou, 22, mother of 20-month-old Zeinab, travelled more than 15 kms from her village to reach Save the Children's malnutrition unit at a hospital in Aguié in the Maradi region after her daughter was referred there following a visit to a health centre. Zeinab arrived in a critical condition. At the centre, medical staff told Indatou that her daughter was malnourished due to an unbalanced and insufficient diet. Zeinab had difficulty breathing and was put in intensive care for 2 days. "I was so distraught. I have never seen my child in such a state. I thought she was going to lose her life. She was breathing so badly and was very weak," Indatou says.

After eight days of treatment, Zeinab has recovered and is ready to go home soon. Indatou is smiling again since her daughter is getting better. As treatment at the malnutrition unit was free, Indatou did not need to pay anything towards her daughter's medical costs.

The HF has helped fund staff, including doctors, nurses, nutritional assistants and hygienists at the malnutrition treatment centre in Aguie, as well as in other similar clinics in other parts of the country. In addition, HF funding has supported cash transfers and cooking demonstrations to strengthen food security across Diffa, Maradi and Tillaberi.

Complex Crises - Haiti

Haiti has been experiencing a deteriorating humanitarian crisis, a mix of socio-economic challenges, tropical storms, earthquakes, gang violence and political instability. All of these have led to spiralling food insecurity, destroyed livelihoods, disease outbreaks and children unable to go to school.

In 2022, the HF provided \$1.6 million to Haiti, which has supported a cholera response, IYCF sessions and malnutrition screening, cash transfers for vulnerable households as well as awareness raising around the importance of children's education.

Nutrition Support in Haiti

An 7.2 magnitude earthquake struck Haiti in August 2021. One year after the emergency many families are struggling to access food due to the instable socio-economic and security situation in the country.

HF funding has enabled the Haiti CO to organise IYCF awareness and screening sessions to prevent acute malnutrition and improve the nutrition status of children under five, pregnant and lactating women and their families by addressing financial and behavioural barriers to dietary diversity, food consumption and food insecurity. These sessions involve promoting breastfeeding, demonstrations on how to cook nutritious meals and sharing good hygiene practices.

Esther, 19, is attending a nutrition area run by Save the Children.

"I came because I'm learning a lot of things that I didn't know before. I learned breastfeeding is better for the baby through the six first months. This helps the baby grow. I am practicing these things and it makes me happy. I learned that this will help me save money. And it also helps me to fight malnutrition. This helps the child grow and develop quickly and better," Esther says.

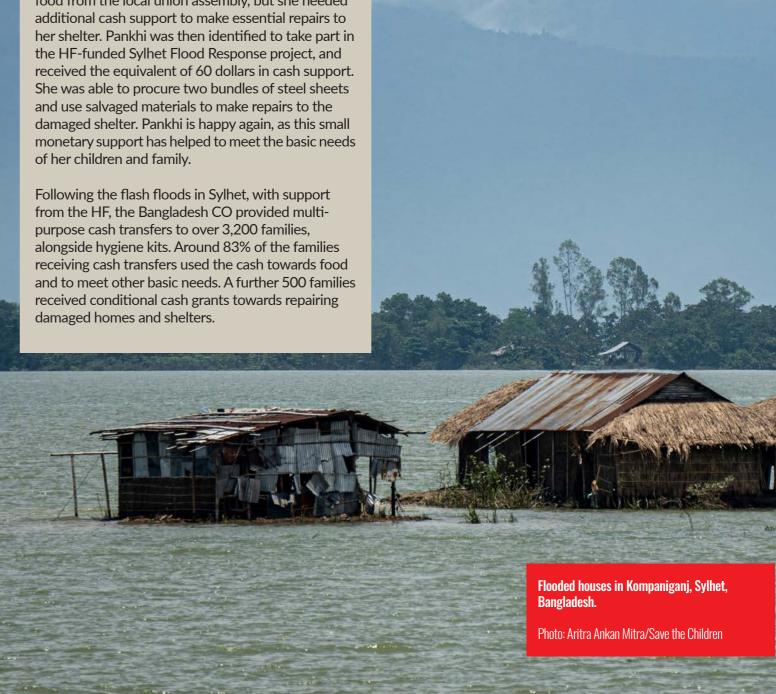

Esther, 19, and her son Alexis at the Save the Children mother and baby area in south west Haiti.

Recovering from Floods in Bangladesh

Pankhi, 28, lives with her husband, who is a day labor fisherman on a low income, and their two sons and two daughters. When the floods came, the vulnerable shelter where Pankhi and her family lived was damaged, putting the family at risk.

Pankhi's family initially received some emergency dry food from the local union assembly, but she needed

Extreme Weather Events -Floods in Asia

The impact of climate change could be seen more clearly than ever in 2022, with numerous extreme weather events causing increasingly severe droughts, floods and storms across the world.

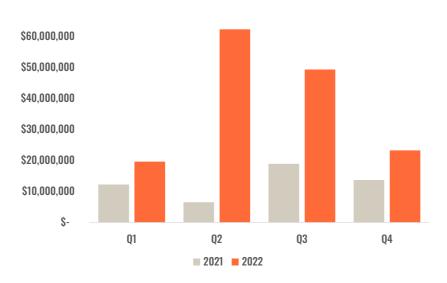

In the autumn of 2022, the HF provided over \$4.5 million to countries experiencing flash flooding in Asia, including Pakistan, Bangladesh, India, Nepal and Indonesia. These funds have helped countries respond to the immediate effects of the floods, as well as put in place anticipatory actions to increase the resilience of communities and reduce the impact of future crises. More than 550,000 people were reached across these countries in 2022.

Two Years of the Humanitarian Fund

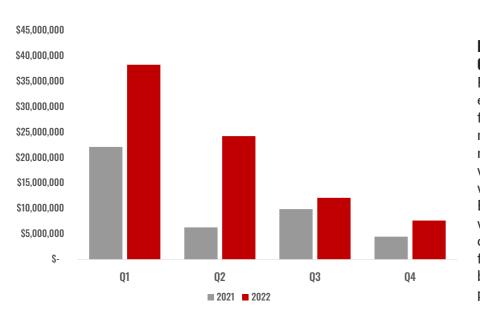

In its second year of operations, the HF channelled four times the amount of funding as it did in 2021. The following graphs provide a snapshot of some of the trends across regional allocations, funding for local and national partners, as well as on the timing of fully flexible funding contributions from members across the two years.

ALLOCATION AMOUNTS BY QUARTER

Quarterly allocation amounts remained largely uniform across 2021, with slightly higher totals in Q3 and Q4. However, in 2022 there was a significant peak in allocations in Q2 and Q3, which was due to large rounds of allocations to countries affected by hunger, as well as high allocation amounts to the Ukraine crisis.

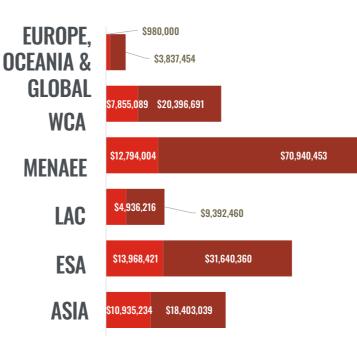

WCA \$660,703 WCA \$291,236 MENAEE \$2,450,956 LAC \$327,393 S \$1,921,611 \$98,195 \$3,678,826 ASIA \$235,044

FULLY FLEXIBLE CONTRIBUTIONS BY QUARTER

Fully flexible HF funding, excluding earmarked contributions, increased from \$42.8 million in 2021 to \$82.3 million in 2022. In both years, the majority of fully flexible contributions were made at the start of the year, with lowest amount pledged in Q4. Earlier contributions support the HF with planning and helps us provide consistent support early in the year for implementing teams so they are better able to prepare, anticipate and plan for predictable needs.

2021 2022

ALLOCATIONS TO LOCAL PARTNERS

\$8,149,937

The above graph shows the regional breakdown of funding channelled to local and national partners in 2021 and 2022. In addition to an overall increase in these allocations from \$3,075,431 in 2021 to \$14,783,470 in 2022, the proportion of funding channelled to local partners out of all HF allocations also increased from 6% to 9.5%.

ALLOCATIONS BY REGION

The overall amount of funding allocated has tripled from 2021, from \$51.5 million allocated in 2021 to \$154.6 million in 2022. The most significant change in the regional split is a notable increase in the 2022 MENAEE allocations in comparison to both 2021 and to the other regions, which is due to the high amount of earmarked funding allocated to the Ukraine crisis. However, excluding the \$55.6 million allocated to MENAEE countries responding to the Ukraine crisis, MENAEE saw the lowest proportional increase in funding in 2022. This was partly due to a significant increase in earmarked allocations to other regions, particularly Asia and ESA, whereas the majority of earmarked funding for MENAEE was directed towards the Ukraine crisis.

In addition to allocations to members in Europe and Oceania, the Global category for 2022 includes \$1,011,185 allocated for the management and administration of the HF, which represents 0.5% of all contributions last year.

HF Spending

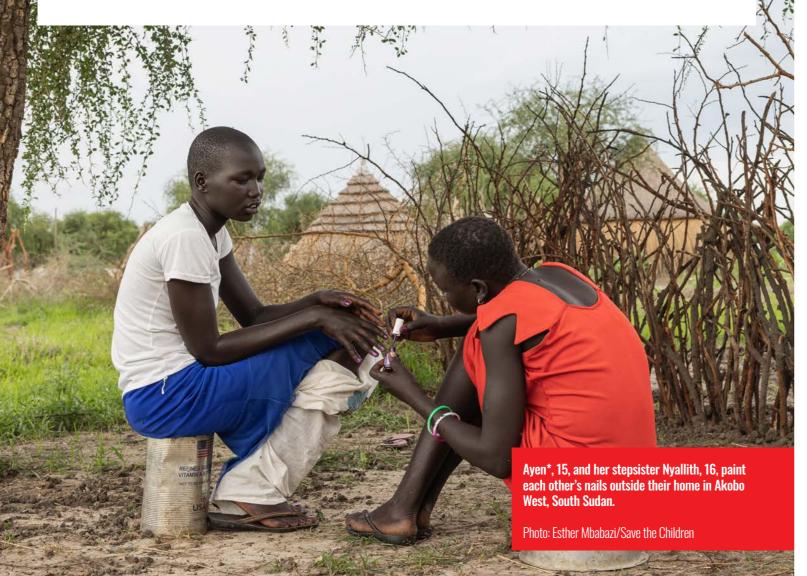

As of the end of 2022, the spend on HF awards was \$142,581,458¹, with the overall spend rate at 69%. This total includes funds allocated between January 2021 and December 2022. \$114,310,900, or 80%, of this was spent in 2022.

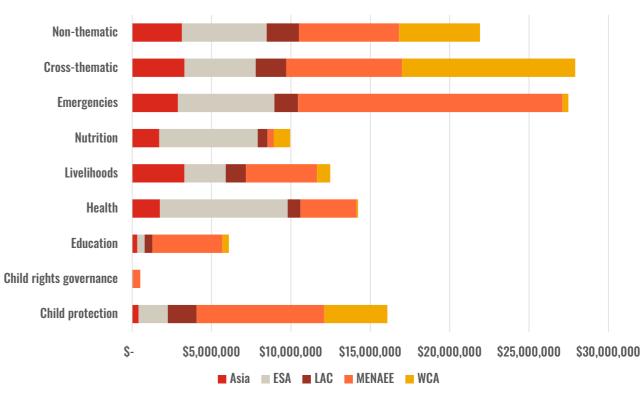

80% of the funds were spent on direct implementation of humanitarian activities, with 13% on humanitarian strategy and design, and 6% on shared direct costs.²

¹This total does not include spend on some member-held awards, where a final financial report is yet to be submitted. For funding awarded to members, actual spend figures from quarterly financial reports are used for the purposes of this report, rather than the total award amounts transferred to the member, which may result in some differences in the overall HF spend in some SCI financial reports.

²Where country or member office DRCs do not align with those currently used by the HF, budget lines have been consolidated under the relevant HF budget categories to accurately reflect spend.

	Asia	ESA	LAC	MEEE	WCA	Global & Centre	TOTAL
Humanitarian							
Strategy & Design	\$2,462,438	\$5,810,254	\$1,291,870	\$5,296,668	\$3,574,036	\$622,561	\$19,057,827
Humanitarian Delivery	\$15,106,613	\$26,988,304	\$9,021,593	\$43,684,176	\$17,061,307	\$2,659,863	\$114,521,856
Shared Direct Costs	\$1,106,831	\$2,563,771	\$861,945	\$2,349,752	\$2,112,048	\$7,429	\$9,001,775
TOTAL	\$18,675,882	\$35,362,329	\$11,175,408	\$51,330,595	\$22,747,391	\$3,289,853	\$142,581,458

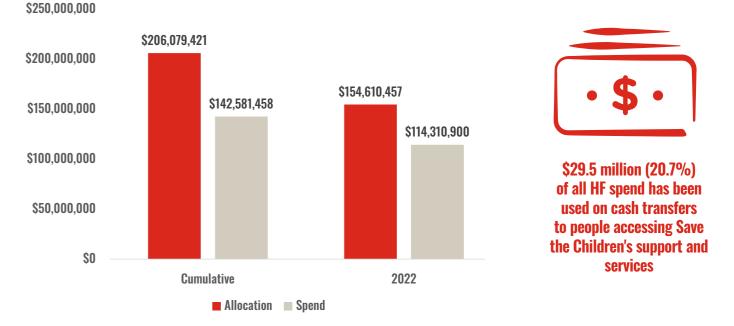

USE OF FUNDS: SPEND BY THEME AND REGION

The above graph shows spend by thematic area and by region. The highest total amounts were spent on crossthematic costs and emergencies. For Asia, the highest spend was on livelihoods, for ESA on health, for LAC on non-thematic costs, for MENAEE on emergencies and for WCA on cross-thematic costs. As the thematic breakdown of spend is not available for member offices that have received HF funding, these are not included in the graph. Because of this, the spend total on the thematic breakdown is lower than the HF's overall total spend.

Cross-thematic costs include monitoring, evaluation, accountability and learning (MEAL), advocacy and program management amongst others. Non-thematic costs include logistics, media, grants management, proposal development, finance, administration and HR. Emergencies includes a mix of humanitarian programmatic costs that have not been coded under a specific theme.

ALLOCATIONS VS SPEND

The graph above shows the amount of funding allocated versus the amount of funding spent both cumulatively for all HF awards and for 2022. The 2022 expenditure includes spend on allocations from both 2021 and 2022. The allocation and spend totals above include funding for the Ukraine and related refugee responses.

Next Steps for the HF

Strategic Use of Funds

In 2023, the HF will focus on promoting the strategic use of flexible funds. This includes encouraging countries to use the flexibility of the HF in innovative and creative ways that emphasise the added value of the HF and enable countries to respond in ways that may not be possible through other donor funding.

2023 Humanitarian Plans

As part of the shift towards a more strategic and holistic use of funds, the HF is funding a proportion of COs' 2023 Save the Children Humanitarian Plan funding targets. Recipients can use these funds when and where they best see fit to strategically support the realisation of their broader annual plans, promoting maximum impact for people in need.

Localisation

In 2023, the HF will continue to support localisation through both responsive allocations and designated rounds of allocations. This could, for example, include funding for hunger responses that are delivered through local partners or include substantial capacity strengthening and involvement of local partners in other ways.

2023 Funding Target

A new annual HF funding target has been agreed for 2023. With the new target, the HF aims to secure \$120 million in fully flexible and earmarked funding in the upcoming year.

Ethel, 12, displaced by Cyclone Ana and floods in Malawi.

2022 Challenges and Achievements

Quadrupling the amount of HF funding from 2021 was both a challenge and a huge achievement for the HF. As a result, the HF was able to allocate higher amounts of funding to more countries, enabling more humanitarian action through flexible funds, helping countries maximise their impact. However, the increased amount of funding also highlighted the need to strengthen and improve HF systems and processes to ensure the growing number of contributions and applications are managed in a timely and accountable manner. This includes developing robust and comprehensive monitoring systems for the HF, as well as refining the application and country reporting processes to ensure that countries receive funds faster and that relevant and accurate information is available on how the funds are being used. Strengthening the HF's ways of working will continue into 2023.

s been allocated to Zimbabwe to implement anticipatory ies. Whilst the budgeted overhead costs are higher than oted for an HF allocation, the food insecurity in Zimbabwe is ighest in Southern Africa, the needs are clear, and the funds e CO position themselves well to upcoming institutional ortunities.

unt (\$252,073) has been approved. While we are concerned e of this award to support high overhead costs, we also hat the needs on the ground are clear, and that immediate is essential, which is why this application is being approved exception.

r need with the number of fatalities and the recent increase The response would be localised (geographical area and , and the team have capacity to respond. The Emergency are also supporting.

About the Humanitarian Fund

In January 2021, the Humanitarian Fund replaced all other flexible funding mechanisms including the Children's Emergency Seed Fund (CSF), Global Central Fund for COVID-19 (GCF) and other pooled seed and appeal funds, and will become the sole flexible fund across Save the Children.

Funded by Members and managed by the Center, the Humanitarian Fund aims to ensure fast and efficient distribution of flexible money to our humanitarian responses across the world.

The Humanitarian Fund will enable our responses to plan, design and deliver high quality humanitarian action for the children and communities we serve during crises. In addition to the categorized responses, the Humanitarian Fund also supports Anticipatory Action and emergency preparedness in order to reduce the impact of crises.
